Open with Prayer

Exodus 7: 10-12 Amplified Bible

¹⁰ So Moses and Aaron came to Pharaoh and did just as the LORD had commanded; Aaron threw down his staff before Pharaoh and his servants, and it became a serpent.

¹¹ Then Pharaoh called for the wise men [skilled in magic and omens] and the sorcerers [skilled in witchcraft], and they also, these magicians (soothsayer-priests) of Egypt, did the same with their secret arts *and* enchantments.

¹² For every man threw down his staff and they turned into serpents; but Aaron's staff swallowed up their staffs.

2 Chronicles 7:14 Amplified Bible

¹ and My people, who are called by My Name, humble themselves, and pray and seek (crave, require as a necessity) My face and turn from their wicked ways, then I will hear [them] from heaven, and forgive their sin and heal their land.

1) The aim is to get a team creating workable platform:

- ✓ Based on conservative, Christian & Biblical principals
- ✓ All activities must be 100% legal within RSA Law
- ✓ We need a new governance system for South Africa
- ✓ Get the EDEN communities positively involved
- ✓ Have 5 year proof of concept plan towards a solution
- ✓ A Decentralised system is the only way to save RSA

2) What we the team in principal must agree on the no-no's:

- × We will never get politics out of local government no-no we will
- × Current Government will never collapse – they will it is a fact
- × We pay for services not rendered and pay again that is a no-no
- × Debt of government is not our problem to deal with – Huge no-no
- × One set of rules for all South African communities a deviate no-no
- × We reject the The National Democratic Revolution (NDR) of the ANC

If you share our values and vision, and would like to be part of the team, please email us at: bestuur@mgev.co.za – Let us lead.

Link: GNU Collapse is emanant reasons why:

Here's a concise, analytical list of ten points that reflect the systemic and geopolitical pressures threatening the stability of South Africa's Government of National Unity (GNU):

- 1) **Ideological incompatibility** between coalition partners like the ANC and DA has led to persistent infighting and policy deadlock.
- 2) **Corruption and cadre deployment** continue to erode public trust and administrative efficiency, undermining the GNU's
- 3) **International backlash** over South Africa's stance on Israel and ICC-related tensions has strained diplomatic relations and investor confidence.
- 4) **Global instability**, including the collapse of fragile states like Iraq, amplifies pressure on South Africa to maintain internal cohesion amid rising populism.
- 5) **The "Kill the Farmer" rhetoric** fuels racial polarization and global condemnation, weakening the GNU's moral and political standing.
- 6) **Mass emigration of skilled taxpayers**, particularly white professionals, is shrinking the fiscal base and accelerating economic decline.
- 7) **Security cluster disputes** within the GNU—especially over control of key portfolios—have exposed deep fractures in governance.
- 8) **Public service collapse** at municipal levels, driven by incompetence and political interference, reflects the broader failure of cooperative
- 9) **Foreign policy incoherence**, such as clandestine trips to Israel by coalition members, has triggered internal backlash and accusations of betrayal.
- 10) **Grassroots disillusionment** with elite-driven politics is fuelling calls for decentralized, community-led alternatives—further destabilizing the central GNU model.

Why should we prepare for the collapse of the GNU

Service delivery collapse

Failing infrastructure and municipal dysfunction create a vacuum that leaves communities without water, electricity, or waste management.

SASSA payment failures

Millions depend on grants; any disruption could trigger mass unrest and humanitarian crises.

Civil unrest and instability

As seen in 2021, unresolved grievances can erupt into widespread violence, looting, and economic paralysis.

Power vacuums exploited by gangs

Organized crime syndicates may seize control of local governance structures, deepening lawlessness.

Loss of central authority

Without a functioning state, communities must self-organize to protect lives, property, and essential services.

Five-Year Window

A Five-Year Window to Save a Nation

After 32 years of promises, plans, and political posturing, South Africans are still denied the basic dignity of reliable services, accountable leadership, and safe communities. The current system—no matter how elegantly framed in policy—has failed in practice. It is time to stop doing the same thing and expecting a different outcome.

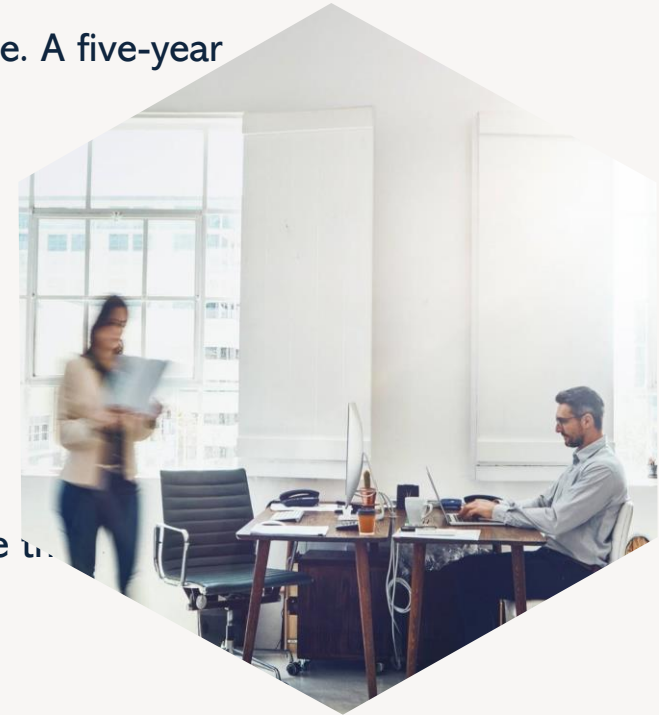

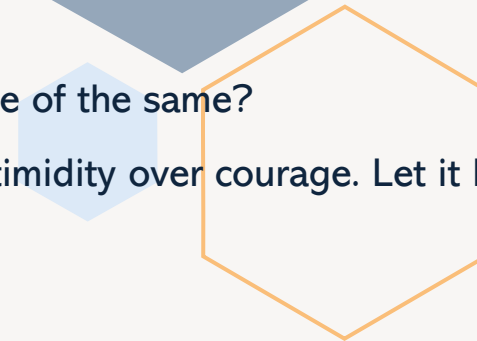

As Rita Mae Brown aptly noted, *“Insanity is doing the same thing over and over again and expecting different results.”* South Africa’s governance trajectory has mirrored this definition for far too long. Communities are disempowered, corruption is normalized, and local governments are no longer instruments of service—they are relics of elite control.

That is why the Eden Proof-of-Concept is not just an experiment in decentralization—it is a moral imperative. A five-year transition is not a luxury; it is a strategic necessity. It offers:

- **Urgent institutional repair** before state collapse becomes irreversible.
- **A model of accountability** rooted in community-led oversight.
- **Local economic regeneration** through practical control over budgets and services.
- **Hope and stability**, in a time of increasing unrest and institutional decay.

If not now, when? If not Eden, where? If not decentralization, then what—more of the same?

Let this not be remembered as a time we had the tools to rebuild and chose timidity over courage. Let it be the beginning of a new governance chapter—written from the bottom up.

Documents to be Reviewed:

- From Self-Sufficiency in 1994 to Dependency in 2025
- The Salary Paradox: Politicians vs. Professionals
- Billing System Failures and Data Integrity Issues
- R13.89 Billion (Water) and R19.12 Billion (Electricity) Distribution Losses (2024/25)
- At-Risk Municipal Infrastructure Assets

Underlying Causes Identified:

- Revenue Collection Collapse
- Over-reliance on Consultants
- Corruption and Nepotism
- Lack of Skilled Personnel
- Infrastructure Decay
- Weak Integration of Traditional Governance Structures

Next Steps What If.....???????

- 1) The government rejects our: Plan – 3 Steps to follow
- 2) The government accepts our: Plan - 2 Steps to follow

What will the next steps be end of - July 2025

If we have no feedback from CoGTA!!!!

The government rejects our Plan – Three steps

Immediately start working together as a team to implement the NTU legal dispute system in all seven municipalities of Eden:
